PROFESSIONAL SUMMARY

Mobile Application Developer with 4+ years of Flutter development experience, Bachelor's in Computer Science, MBA, and team leadership background. Successfully developed and published multiple applications across fintech, professional services, and enterprise automation sectors. Led development teams of 3 members for 8 months, managing project delivery and stakeholder communication. Proven expertise in API integration, cross-platform development, and system synchronization with government and enterprise platforms. Seeking challenging opportunities in software development or project management roles within European tech companies.

CORE SKILLS

- Flutter Development
- Team Leadership & Management
- API & System Synchronization
- Problem-Solving & Debugging
- Cross-platform Development

- Client Relationship Management
- Project Management
- Excellent Communication Skills
- Version Control Systems
- Exceptional Organisational Skills

PROFESSIONAL EXPERIENCE

Bizhub Consulting Services
2021 - June 2025

Senior Software Engineer (8 months)

Software Engineer (2 years 1 month)

Junior Software Engineer (1 year 3 months)

- Led cross-functional development team of 3 members, overseeing project delivery, code reviews, and mentoring junior developers while maintaining hands-on development responsibilities
- Served as primary client liaison for requirements gathering, stakeholder communication, and project planning, leveraging MBA background to bridge technical and business requirements
- Developed and maintained Bizforce360, a comprehensive sales force automation and warehouse management system with real-time ERP integration (German software) and IRD Nepal synchronization for automated invoice generation
- Successfully delivered multiple solo projects including Been Connect (professional networking platform), TinyBee 1 (AI-powered ERP reporting system), and HR management system for Simrik Airlines (one of Nepal's top airlines)
- Implemented significant process improvements across development lifecycle, resulting in enhanced client satisfaction through honest communication, active requirement analysis, and reliable project delivery
- Collaborated extensively with Node.js backend development team for seamless API integration and system architecture optimization
- Managed end-to-end mobile application development from concept to deployment, ensuring cross-platform compatibility and enterprise-level system integration

KEY PROJECTS

Aartha AI: AI-integrated investment advisory platform with advanced analytics and user-friendly interface

Bizforce360: Comprehensive sales force automation and warehouse management system with real-time ERP integration and IRD Nepal synchronization

Been Connect: Professional networking application connecting engineers with service seekers across various industries

TinyBee 1: Advanced reporting system that generates crystal reports from ERP data, enables mobile report downloads, and features AI-powered query functionality for report analysis

Simrik Airlines HR Management System: Comprehensive human resource management solution for one of Nepal's leading airlines, streamlining employee management and operational workflows
